

I visited in 1963 with my brother since our grandfather's family is supposedly buried there. Our visit took place on a rainy day. Since the cemetery is located on a rather steep hill, we were really not able to do much investigation, just slipping and falling. "Borikovy ... was under the administration of Klatovy, which is under the administration of Pilsen. The cemetery is under the administration of Pilsen. The cemetery is on the outskirts of Kolin near Boricovy that is S.E. of Borikovy that is about 20 km from Klatovy. The original wall around the cemetery is mostly defunct from old age." My brother Herbert Goldman (PO Box 6447, Haifa, Israel 346642) has been there several times and looked up the existing lists. I would estimate that there are less than 100 tombstones.
